

Photosynthesis Research

CONTENTS

Photosynthesis Research, Volume 76 (2003), in the press

Celebrating the Millennium

Historical Highlights of Photosynthesis Research, Part 2

Guest Editors: Govindjee, J Thomas Beatty & Howard Gest

Front Matter: Celebrating the Golden Jubilee of the 1952 Gatlinburg Conference on Photosynthesis

Cover: It will have a 1956 quotation by Eugene Rabinowitch

Table of Contents

Introduction

**Celebrating the millenium--historical highlights of photosynthesis research. Part 2
Govindjee, J. T. Beatty, H. Gest (USA & Canada)**

***Photosynthesis research: advances through molecular biology
L. Bogorad (USA)**

***Mapping the carbon reduction cycle: a personal retrospective
J. A. Bassham (USA)**

[*The above two authors will have their photos facing their first pages.]

Affixing the O to rubisco: discovering the source of photorespiratory glycolate and its regulation

W. L. Ogren (USA)

**Period-four oscillation of the flash-induced oxygen formation in photosynthesis
P. Joliot (France)**

**Linking the xanthophyll cycle with thermal energy dissipation
B. Demmig-Adams (USA)**

Electron Donors and Acceptors in The Initial Steps of Photosynthesis in Purple Bacteria: A personal account

W. W. Parson (USA)

Tributes

Hydrogen metabolism of green algae discovery and early research - a tribute to Hans Gaffron and his coworkers

P. H. Homann (USA)

A tribute: contributions of Henrik Lundegårdh to photosynthesis

A. W. D. Larkum(Australia)

Anoxygenic Photosynthesis

Discovery and characterization of electron transfer proteins in the photosynthetic bacteria

T. E. Meyer, M. A. Cusanovich (USA)

Membrane-anchored cytochrome *c* as an electron carrier in photosynthesis and respiration: past, present and future of an unexpected discovery

F. Daldal, M. Deshmukh, R. C. Prince (USA)

Every dogma has its day: a personal look at carbon metabolism in photosynthetic bacteria

J. Ormerod (Norway)

Light induced behavioral responses ('phototaxis') in prokaryotes

J. P. Armitage, K. J. Hellingwerf (UK & The Netherlands)

Anoxygenic phototrophs from extreme environments

M. T. Madigan (USA)

Evolutionary relationships among photosynthetic bacteria

R. S. Gupta (Canada)

Oxygenic Photosynthesis

Chloroplast Structure, Membranes and Chromoprotein Complexes

Chloroplast structure: from chlorophyll granules to supra-molecular architecture of thylakoid membranes

L. A. Staehelin (USA)

Phycobiliproteins and phycobilisomes: the early observations

N. Tandeau de Marsac (France)

A molecular understanding of complementary chromatic adaptation

A. R. Grossman (USA)

The contribution of photosynthetic pigments to the development of biochemical separation methods: 1900-1980

P-A Albertsson (Sweden)

Physical separation of chlorophyll protein complexes

T. Ogawa (Japan)

The identification of the photosystem II reaction center

K. Satoh (Japan)

Excitation Energy Transfer and Electron Carriers

Excitation transfer between photosynthetic units: the 1964 experiment

P. Joliot, A. Joliot (France)

Discovery of pheophytin function in the photosynthetic energy conversion as the primary electron acceptor of photosystem II

V. V. Klimov (Russia)

Early research on the role of plastocyanin in photosynthesis

S. Katoh (Japan)

Electron Transfer and Oxygen Evolution

The isolated photosystem II reaction center--first attempts to directly measure the kinetics of primary charge separation

M. Seibert, M.R. Wasielewski (USA)

Apparatus and mechanism of photosynthetic oxygen evolution: historical lines of research and current state of the art

G. Renger (Germany)

On some aspects of photosynthesis revealed by photoacoustic studies: a critical evaluation

R. Delosme (France)

The history of photosynthetic thermoluminescence

I. Vass (Hungary)

Carbon Fixation

Chloroplasts in envelopes: CO₂ fixation by fully functional intact chloroplasts

D. A. Walker (UK)

Crassulacean acid metabolism photosynthesis: "working the night shift"

C. C. Black, B. Osmond (USA)

Photoinhibition

Photoinhibition -- a historical perspective

N. Adir, H. Zer, S. Shochat, I. Ohad (Israel)

Chloroplast Genomics

History of chloroplast genomics

M. Sugiura (Japan)

Photosynthesis Laboratories and Research Around the World

Photosynthesis and the Charles F. Kettering Research Laboratory

L. P. Vernon (USA)

Chlorophyll isolation, structure and function: major landmarks of the early history of research in the Russian Empire and the Soviet Union

[A.A. Krasnovsky Jr.\(Russia\)](#)

Studies of chlorophyll biosynthesis in Russia

[O. B. Belyaeva\(Russia\)](#)

The beginnings of research on biophysics of photosynthesis and initial contributions made by Russian scientists to its development

[A.Borisov\(Russia\)](#)

Photosynthesis research in Greece: a historical snapshot (1960 - 2001)

[G. C. Papageorgiou\(Greece\)](#)

Photosynthesis research in India: from yield physiology to molecular biology

[A. S. Raghavendra, P V. Sane, P. Mohanty \(India\)](#)

Photosynthesis research in China

[Ting-Yun Kuang , Chunhe Xu, Liang-Bi Li, Yun-Kang Shen \(China\)](#)
