

Contents

<i>Chapter 1</i>	PHOTOSYNTHESIS: THE POWER PLANT AND THE CHEMICAL FACTORY OF LIFE	1
	The Age of Pneumochemistry	2
	Improvement of Air by Plants and the Role of Light	3
	The Participation of Carbon Dioxide and Water	5
	Energy Storage in Photosynthesis	7
	The Products of Photosynthesis	9
<i>Chapter 2</i>	OVERALL CHEMISTRY OF PHOTOSYNTHESIS; AUTOTROPHIC AND THE HETEROTROPHIC WAYS OF LIFE	11
	Total Yield of Organic Synthesis and Energy Storage on Earth	11
	The Carbon and Oxygen Cycles on Earth	15
	Photoautotrophic, Chemoautotrophic and Heterotrophic Ways of Life	18
	Origin and Evolution of Life	20
<i>Chapter 3</i>	OVERALL ENERGETICS OF PHOTOSYNTHESIS	22
	Energy, Entropy, Free Energy	22
	Photosynthesis and Respiration	28
	Energetics of Bacterial Photosynthesis	33
<i>Chapter 4</i>	SOLAR ENERGY AND ITS UTILIZATION	34
	Solar Energy Supply on Earth	34
	Green Plants as Converters of Solar Energy	38
		ix

<i>Chapter 5</i>	ENERGETICS OF PHOTOSYNTHESIS: A CLOSER LOOK	42
	Molecular Origin of Photosynthetic Energy	42
	Oxidation-Reduction Potentials	46
<i>Chapter 6</i>	TAKING PHOTOSYNTHESIS APART. I. THE LIGHT AND THE DARK STAGE	56
	The Photochemical and the Enzymatic Stage	56
	Light Saturation and Its Implications	60
	Photosynthesis in Flashing Light	66
<i>Chapter 7</i>	TAKING PHOTOSYNTHESIS APART. II. PHOTOCHEMICAL ACTIVITIES OF CHLOROPLASTS AND CHLOROPHYLL SOLUTIONS	73
	Chloroplasts: The Hill Reaction	73
	Photochemistry of Chlorophyll Solutions	79
<i>Chapter 8</i>	STRUCTURE AND COMPOSITION OF THE PHOTOSYNTHETIC APPARATUS	82
	Chloroplasts, Grana, Lamellae	82
	Photosynthetic Units	89
	Proteins and Lipoids	92
	Nucleotides and Quinones	95
	The Pigments: Their Location in the Chloroplasts	95
<i>Chapter 9</i>	THE PHOTOSYNTHETIC PIGMENTS	102
	The Pigment Molecules	102
	Chloroplast Pigments: General Remarks	105
	Chlorophylls	109
	Structure	109
	Absorption Spectra	113
	Chromatic Adaptation	114
	Phycobilins (Phycoerythrins and Phycocyanins)	115
	Structure	115
	Absorption Spectra	117

Carotenoids	118
Structure	118
Absorption Spectra	118
Multiplicity of Chlorophyll <i>a</i> Forms in Vivo	119
 <i>Chapter 10</i> ABSORPTION OF LIGHT AND FATE OF EXCITATION ENERGY IN PLANT CELLS	 124
Properties of Solar Radiation	127
Beer's Law	129
Mechanism of Light Absorption and Emission	131
Fate of Excitation Energy in Photosynthesizing Cells	135
 <i>Chapter 11</i> ACTION SPECTRUM AND QUANTUM YIELD OF PHOTOSYNTHESIS	 141
The Action Spectra of Photosynthesis	143
The Maximum Quantum Yield of Photosynthesis	148
The Red Drop	151
 <i>Chapter 12</i> ENERGY TRANSFER AND ENERGY MIGRATION IN PHOTOSYNTHESIS	 152
Heterogeneous Energy Transfer	154
Homogeneous Energy Transfer	159
Electron Migration	164
 <i>Chapter 13</i> THE TWO PHOTOCHEMICAL SYSTEMS; THE RED DROP AND THE EMERSON EFFECT	 168
The Red Drop: "Active" and "Inactive" Chlorophyll <i>a</i>	168
The Emerson Effect; the Hypothesis of Two Photochemical Reactions and Two Pigment Systems	172
The Hill Reaction and the Bacterial Photosynthesis: Two Systems or One?	182

<i>Chapter 14</i>	DIFFERENCE SPECTROSCOPY: THE ROLE OF THE CYTOCHROMES, P700, PLASTOQUINONE AND PLASTOCYANIN	183
	Difference Spectroscopy	183
	The Cytochromes	187
	The Difference Bands at 480 and 520 nm	190
	Pigment P700 and P690	191
	Plastoquinone and Plastocyanin	193
	Bacteria	194
<i>Chapter 15</i>	FLUORESCENCE AND THE TWO PIGMENT SYSTEMS	196
	Spectrum of Chlorophyll <i>a</i> Fluorescence in Vivo	199
	Fluorescence at Room Temperature	199
	"Strongly" and "Weakly" Fluorescent Chlorophyll <i>a</i> Forms in Vivo	199
	Action Spectrum of Chlorophyll <i>a</i> Fluorescence in Vivo: The "Red Drop"	203
	Polarization of Chlorophyll <i>a</i> Fluorescence	204
	Induction of Chlorophyll <i>a</i> Fluorescence in Vivo	205
	Fluorescence at Low Temperatures	206
	Emission Spectra	206
	Fluorescence from "Traps?"	207
	Action Spectra	210
	Dependence of Fluorescence Yield on Light Intensity	210
	The Two-Light Effect	213
	Delayed Fluorescence	215
<i>Chapter 16</i>	SEPARATION OF THE TWO PIGMENT SYSTEMS	216
<i>Chapter 17</i>	THE ENZYMATIC PATHS FROM WATER TO MOLECULAR OXYGEN AND FROM CARBON DIOXIDE TO CARBOHYDRATES	220
	Path to Molecular Oxygen	220
	The Junction of the Photochemical Process with the Enzymatic Sequence of the CO ₂ Reduction	221

The Path of Carbon in Photosynthesis	223
The First Stable Product of CO ₂ Fixation: Phosphoglyceric Acid	226
The Primary CO ₂ Acceptor: Ribulose Diphosphate	229
The Reduction of Phosphoglyceric Acid	232
The Transformation of Carbohydrates	235
Regeneration of Ribulose Diphosphate	236
The Calvin Cycle: Concluding Remarks	237
Alternate Pathways	238
 <i>Chapter 18</i> PHOTOPHOSPHORYLATION	 241
High Energy Phosphate	241
ATP-Need in Photosynthesis	244
Photosynthetic Phosphorylation	246
 <i>Chapter 19</i> SUMMARY AND OUTLOOK	 250
 <i>Bibliography</i>	 257
<i>Index</i>	263
