Part 1: Structures, Chemistry, Analysis

1	An Overview of Chlorophylls and Bacteriochlorophylls: Biochemistry, Biophysics, Functions and Applications	1–26
	<i>Hugo Scheer</i>	
	Summary	1
	I. Introduction	2
	II. Structures	4
	III. Why Chlorophylls?	12
	IV. Functions	16
	Acknowledgments	19
	References	19
2	Synthesis, Reactivity and Structure of Chlorophylls	27–37
	<i>Mathias O. Senge, Arno Wiehe and Claudia Ryppa</i>	
	Summary	27
	I. Basic Structure and Reactivity of Chlorophylls	28
	II. Conformational Flexibility of Hydroporphyrins	28
	III. Chemical Synthesis of Chlorophylls and Bacteriochlorophylls	29
	IV. Chemical Modifications	30
	Acknowledgments	35
	References	35
3	Chlorophyll c Pigments: Current Status	39–53
	<i>Manuel Zapata, José L Garrido and S. W. Jeffrey</i>	
	Summary	40
	I. Introduction	40
	II. Chemistry of Chlorophyll c Pigments	41
	III. Biochemistry of Chlorophyll c Pigments	46
	IV. Distribution	47

	V. Applications and Future Directions	47
	Note Added in Proof	50
	Acknowledgments	50
	References	50
4	Unusual Tetrapyrrole Pigments of Photosynthetic Antennae and Reaction Centers: Specially-tailored Chlorophylls	55–66
	<i>Masami Kobayashi, Machiko Akiyama, Hideo Kise and Tadashi Watanabe</i>	
	Summary	56
	I. Introduction	56
	II. Specially-tailored Chlorophylls in a Limited Number of Organisms	56
	III. Specially-tailored Chlorophylls Associated with Reaction Centers	59
	Acknowledgments	63
	References	63
5	[Heavy metal]-Chlorophylls Formed in Vivo During Heavy Metal Stress and Degradation Products Formed During Digestion, Extraction and Storage of Plant Material	67–77
	<i>Hendrik Küpper, Frithjof C. Küpper and Martin Spiller</i>	
	Summary	67
	I. Introduction	68
	II. Substitution of the Central Mg ²⁺ Ion Under Elevated Heavy Metal Concentrations in vivo	68
	III. Occurrence of Partially Degraded and Transmetalated Chlorophyll Derivatives in Marine Invertebrates	72
	IV. Chlorophyll Degradation Products Formed During Storage and Extraction of Plant Material	73
	Acknowledgments	75
	References	75
6	Spectroscopy and Structure Determination	79–94
	<i>Masami Kobayashi, Machiko Akiyama, Hiromi Kano and Hideo Kise</i>	
	Summary	79
	I. Introduction	80
	II. Absorption Spectra	80
	III. Fluorescence Spectra	85
	IV. Circular Dichroism Spectra	87
	V. Mass Spectra	88
	VI. Nuclear Magnetic Resonance Spectra	90
	Acknowledgments	93
	References	93
7	Spectrometric Assays for Plant, Algal and Bacterial Chlorophylls	95–107
	<i>Robert J. Porra</i>	
	Summary	95
	I. Introduction	96

II. Modern Spectrophotometric Assays of Chlorophylls <i>a</i> and <i>b</i>	96
III. Choice of Extractant and Determination of Accurate Extinction Coefficients for Chlorophylls <i>a</i> and <i>b</i> in Such Solvents	96
IV. Reliable Simultaneous Equations for the Accurate Assay of Chlorophylls <i>a</i> and <i>b</i>	99
V. The Unacceptable Errors and Consequences of Using the Arnon Equations	100
VI. Other Spectrophotometric Assays for Chlorophylls <i>a</i> and <i>b</i> in Association with Their Derivatives or Other Pigments	101
VII. Spectrophotometric Assays for Chlorophylls in Chlorophyll <i>c</i> -containing Algae	101
VIII. Spectrophotometric Data for the Assay of Bacteriochlorophylls	101
IX. Spectrofluorimetric Assays for Chlorophylls <i>a</i> and <i>b</i>	103
X. Concluding Remarks	105
Acknowledgments	105
References	105

8 Chlorophyll Analysis by New High Performance Liquid Chromatography Methods **109–121**

José L. Garrido and Manuel Zapata

Summary	109
I. Introduction	110
II. New Bonded Phase Columns	110
III. Mass Spectrometry as High Performance Liquid Chromatography Detection Technique Applied to Chlorophylls	112
IV. Applications	113
V. Future Directions in the High Performance Liquid Chromatography Analysis of Chlorophylls	115
Acknowledgments	119
References	119

9 Large Scale Chlorophyll Preparations Using Simple Open-Column Chromatographic Methods **123–131**

Yuzo Shioi

Summary	124
I. Introduction	124
II. Extraction of the Pigments	124
III. Precipitation of Chlorophylls	126
IV. Column Chromatographic Methods	127
Acknowledgments	130
References	131

Metabolism

10 Chlorophyll Metabolism, an Overview **133–146**

Wolfhart Rüdiger and Bernhard Grimm

Summary	133
I. Introduction	134
II. The Diversity of Tetrapyrrole Metabolic Pathways	134

III. Subcellular Location of Enzymes	140
IV. Regulation of Chlorophyll Biosynthesis	140
V. Incorporation into Proteins	142
VI. Chlorophyll Degradation	143
VII. Concluding Remarks	143
References	143

11 Biosynthesis of 5-Aminolevulinic Acid **147–158**

Samuel I. Beale

Summary	147
I. Alternate Pathways for 5-Aminolevulinic Acid Biosynthesis	147
II. 5-Aminolevulinic Acid Biosynthesis from Glycine and Succinyl-Coenzyme A	148
III. 5-Aminolevulinic Acid Biosynthesis from Five-Carbon Precursors	149
IV. Phylogenetic Distribution and Evolutionary Implications of the Two 5-Aminolevulinic Acid Biosynthetic Pathways in Photosynthetic Species	154
Acknowledgments	154
References	154

12 Transfer RNA-Dependent Aminolevulinic Acid Formation: Structure and Function Of Glutamyl-tRNA Synthetase, Reductase and Glutamate-1-Semialdehyde-2,1-Aminomutase **159–171**

Dieter Jahn, Jürgen Moser, Wolf-Dieter Schubert and Dirk W. Heinz

Summary	159
I. Two Pathways for 5-Aminolevulinic Acid Biosynthesis	160
II. Glutamyl-tRNA Synthetase Forms Glutamyl-tRNA for Protein and Tetrapyrrole Biosynthesis	160
III. tRNA ^{Glu}	160
IV. Glutamyl-tRNA Synthetase	160
V. Glutamyl-tRNA Reductase	163
VI. Glutamate-1-Semialdehyde-2,1-Aminomutase	166
VII. Metabolic Channeling of Glutamate-1-Semialdehyde	167
VIII. Concluding Remarks	167
Acknowledgment	168
References	168

13 The Pathway from 5-Aminolevulinic Acid to Protochlorophyllide and Protoheme **173–188**

Elena Yaronskaya and Bernhard Grimm

Summary	173
I. Introduction	174
II. Enzymes of Porphyrin Synthesis	174
III. The Chlorophyll-synthesizing Branch	178
IV. The Protoheme-synthesizing Branch	182
V. Concluding Remarks	183
References	183

14	Biosynthesis of Chlorophylls <i>a</i> and <i>b</i>: The Last Steps	189–200
	<i>Wolfhart Rüdiger</i>	
	Summary	189
	I. Introduction	190
	II. Protochlorophyllide Reduction	190
	III. Metabolism of Chlorophyll <i>b</i> and Chlorophyllide <i>b</i>	193
	IV. Esterification	195
	Supplement	197
	Note Added in Proof	197
	Acknowledgments	197
	References	197
15	Bacteriochlorophyll Biosynthesis in Green Bacteria	201–221
	<i>Niels-Ulrik Frigaard, Aline Gomez Maqueo Chew, Julia A. Maresca and Donald A. Bryant</i>	
	Summary	201
	I. Introduction	202
	II. Approach to Elucidating Bacteriochlorophyll Biosynthesis in Green Bacteria	203
	III. Overview of Proposed Pathways	206
	IV. Early Steps in Porphyrin Biosynthesis	209
	V. Bacteriochlorophyll <i>a</i> Biosynthesis	209
	VI. Chlorophyll <i>a</i> Biosynthesis	210
	VII. Bacteriochlorophyll <i>c</i> Biosynthesis	211
	VIII. Bacteriochlorophyll <i>d</i> Biosynthesis	215
	IX. Bacteriochlorophyll <i>e</i> Biosynthesis	215
	X. Bacteriochlorophyll <i>c</i> Biosynthesis in Green Filamentous Bacteria	216
	XI. Future Directions	217
	Note added in Proof	217
	Acknowledgments	217
	References	217
16	Involvement of Tetrapyrroles in Cellular Regulation	223–235
	<i>Christoph F. Beck and Bernhard Grimm</i>	
	Summary	223
	I. Introduction	224
	II. Intra-organellar Regulation by Tetrapyrroles	225
	III. Role for Tetrapyrroles in Inter-organellar Signaling	226
	IV. Transport of Tetrapyrroles	230
	V. Concluding Remarks	230
	References	232
17	Chlorophyll Catabolites and the Biochemistry of Chlorophyll Breakdown	237–260
	<i>Bernhard Kräutler and Stefan Hörtensteiner</i>	
	Summary	237
	I. Introduction	238

II. Chlorophyll Breakdown and Chlorophyll Catabolites in Higher Plants	239
III. Chlorophyll Breakdown and Chlorophyll Catabolites in Green Algae	254
IV. Chlorophyll Catabolites from Marine Organisms	255
V. Conclusions and Outlook	256
Note Added in Proof	256
Acknowledgments	257
References	257

18 The Evolution of Chlorophylls and Photosynthesis 261–282

A. W. D. Larkum

Summary	261
I. Introduction	262
II. The Early Earth and the Origins of Photosynthesis	262
III. Evolution of the Pathway to the Earliest Photosynthetic Pigments	263
IV. Evolution of Extant Photosynthetic Pigments and Early Photosynthetic Organisms	267
V. Reaction Centers	272
VI. Evolution of Oxygenic Photosynthesis	275
VII. Light-Harvesting Chlorophyll Proteins	277
VIII. Outlook	278
References	278

The Native Environment

19 The Influence of Protein Interactions on the Properties of the Bacteriochlorophyll Dimer in Reaction Centers 283–295

James P. Allen and JoAnn C. Williams

Summary	283
I. Introduction	284
II. Protein Interactions that Influence the Properties of the Dimer	285
III. Modeling the Effect of Protein Interactions on the Electronic Structure of the Dimer	288
IV. The Effect of Protein Interactions on Electron Transfer	290
V. Conclusions	292
Acknowledgment	292
References	293

20 Magic Angle Spinning Nuclear Magnetic Resonance of the Chlorosomes 297–307

Ido de Boer and Huub J. M. de Groot

Summary	297
I. Introduction	297
II. Aggregated Hydrated Chlorophyll (Chl <i>a</i> /H ₂ O) as a Model for Magic Angle Spinning Nuclear Magnetic Resonance Technology Development	298
III. Self-organization of Bacteriochlorophyll is the Main Structural Feature of the Chlorosomal Antennae	300
IV. A 3-Dimensional Model for the Structure of the Chlorosomal Antennae	303

V. Conclusions and Future Prospects	304
Note Added in Proof	305
References	305

21 Single Molecule Spectroscopy of Pigment Protein Complexes from Purple Bacteria **309–321**

J. Köhler and T.J. Aartsma

Summary	309
I. Introduction	310
II. Spectroscopy of Individual Light-harvesting Complexes	312
Acknowledgments	319
References	319

22 Effects of Axial Coordination, Electronic Excitation and Oxidation on Bond Orders in the Bacteriochlorin Macrocycle, and Generation of Radical Cation on Photo-Excitation of in vitro and in vivo Bacteriochlorophyll a Aggregates: Resonance Raman Studies **323–335**

Yasushi Koyama, Yoshinori Kakitani, Leenawaty Limantara and Ritsuko Fujii

Summary	324
I. The 5- and 6-Coordinated States of Bacteriochlorophyll a in the S ₀ , T ₁ and D ₀ Electronic States as Probed by the Ring-Breathing Frequency	324
II. Changes in Bond Orders as Scaled by Stretching Force Constants in the Conjugated Systems of Bacteriochlorophyll a, Bacteriopheophytin a and Carotenoid: Implication of the Arrangement of Those Pigments in the Reaction Center	329
III. Generation of the T ₁ State and Subsequent Transformation into the D ₀ State upon Photo-Excitation of in vitro and in vivo Bacteriochlorophyll a Aggregates	331
Acknowledgments	334
References	335

23 Mapping the Global Ring Currents in Porphyrins and Chlorins **337–347**

Erich Steiner and Patrick W. Fowler

Summary	337
I. Introduction	337
II. Electronic Structure and Spectra	338
III. Ring Currents	339
IV. Orbital Model of Ring Currents	341
V. The Four-Orbital Model of the Ring Current in Porphyrins	341
VI. Pathways	342
VII. Porphin and Magnesium Porphin	342
VIII. Chlorins	346
Appendix	346
Note Added in Proof	346
References	346

24	Bacteriochlorophyll Protein Maquettes	349–363
	<i>Dror Noy, Christopher C. Moser and P. Leslie Dutton</i>	
	Summary	349
	I. Protein Maquette Tools for Exploring Natural Design of Chlorophyll- and Bacteriochlorophyll-Proteins	350
	II. Essentials of De Novo Designing Protein Maquettes	352
	III. Adapting Natural LHs to Maquettes	353
	IV. Concluding Remarks	360
	Acknowledgments	360
	References	360
25	Molecular Assembly of Bacteriochlorophyll Complexes Using Synthetic Light-Harvesting Model Polypeptides	365–373
	<i>Mamoru Nango</i>	
	Summary	365
	I. Introduction	365
	II. Molecular Assembly of Bacteriochlorophylls with Isolated Light-Harvesting Subunits from <i>Rhodobacter sphaeroides</i> and Synthetic Models	367
	III. Molecular Assembly of Bacteriochlorophyll <i>a</i> Complex and Its Analogues by Synthetic 4 α -Helix Polypeptides	369
	IV. Concluding Remarks	371
	Acknowledgments	372
	References	372
26	Reconstitution and Pigment Exchange	375–385
	<i>Harald Paulsen</i>	
	Summary	375
	I. Introduction	376
	II. Reconstitution	376
	III. Pigment Exchange	379
	IV. Concluding Remarks	381
	Note Added in Proof	381
	References	382
27	Assembly of Model Bacteriochlorophyll Proteins in the Native Lipid Environment	387–396
	<i>Adela Garcia-Martin, Lee Gyan Kwa, Mathias von Jan, Neil C. Hunter and Paula Braun</i>	
	Summary	387
	I. Introduction	388
	II. Bacteriochlorophyll Proteins with Model Transmembrane Helices	388
	III. Assembly Motifs of (Bacterio)chlorophyll Proteins	391
	Acknowledgments	394
	References	394

Functions

28	Photosynthetic Functions of Chlorophylls	397–412
	<i>Alexander N. Melkozernov and Robert E. Blankenship</i>	
	Summary	397
	I. Introduction	398
	II. Structure of Chlorophylls and Their Relevance to Photosynthetic Functions	398
	III. Chlorophyll-Sensitized Electron Transfer	399
	IV. Light-harvesting and Energy Transfer	402
	V. Structural Function	408
	V. Photoprotective Function of Chlorophylls	408
	Acknowledgments	410
	References	410
29	Excitation Energy Transfer Between (Bacterio)Chlorophylls—the Role of Excitonic Coupling	413–430
	<i>Dieter Leupold, Heiko Lokstein and Hugo Scheer</i>	
	Summary	413
	I. Introduction	414
	II. Excitation Energy Transfer in Purple Bacteria	415
	III. Excitation Energy Transfer in Light-Harvesting Complex II-type Complexes of Higher Plants	420
	IV. Excitation Energy Transfer in Chlorosomes	423
	V. Excitation Energy Transfer in the Fenna-Matthews-Olsen (FMO) Complex	424
	Note Added in Proof	425
	Acknowledgments	426
	References	426
30	Mechanisms of Carotenoid-to-Bacteriochlorophyll Energy Transfer in the Light Harvesting Antenna Complexes 1 and 2: Dependence on the Conjugation Length of Carotenoids	431–443
	<i>Yasushi Koyama and Yoshinori Kakitani</i>	
	Summary	431
	I. Introduction	432
	II. Intrinsic Properties of Carotenoids' Excited-States	432
	III. Carotenoid-to-Bacteriochlorophyll Energy Transfer in Light Harvesting Complex 2	434
	IV. Carotenoid-to-Bacteriochlorophyll Energy Transfer in Light Harvesting Complex 1	438
	V. Comparison between the Light Harvesting Complexes 1 and 2	439
	Acknowledgments	442
	References	443
31	Electron Transfer in Photosynthetic Reaction Centers	445–459
	<i>Josef Wachtveitl and Wolfgang Zinth</i>	
	Summary	445
	I. Introduction	446

II. Dynamics and Energetics of the First Electron Transfer Reactions in Bacterial Reaction Centers	446
III. Optimization of Photosynthesis	454
IV. Concluding Remarks	455
References	455

Applications

32 Chlorophyll Sensitizers in Photodynamic Therapy 461–483

Alexander S. Brandis, Yoram Salomon and Avigdor Scherz

Summary	462
I. Introduction	462
II. Photosensitizers Derived from Chlorophyll a	465
III. Clinical Trials	476
Acknowledgments	476
References	476

33 Bacteriochlorophyll Sensitizers in Photodynamic Therapy 485–494

Alexander S. Brandis, Yoram Salomon and Avigdor Scherz

Summary	486
I. Introduction	486
II. Photosensitizers Derived from Bacteriochlorophyll a	487
III. Clinical trials	491
IV. Conclusions and Perspectives	491
Acknowledgements	491
References	492

34 Metal-substituted Bacteriochlorophylls: Novel Molecular Tools 495–506

Roie Yerushalmi, Idan Ashur and Avigdor Scherz

Summary	495
I. Introduction	496
II. From Porphyrins to Bacteriochlorophylls: An Experimental Benchmark for Theoretical Approaches.	496
III. Function-Oriented Chemical Modification of Bacteriochlorophylls	497
IV. Applications	499
V. Concluding Remarks	503
Acknowledgments	503
References	503

35 Chlorophyll Fluorescence as a Reporter on in vivo Electron Transport and Regulation in Plants 507–519

Ladislav Nedbal and Michal Koblížek

Summary	507
I. Introduction	508
II. Time Scales	508
III. Analysis of Chlorophyll Fluorescence Transients	511

IV. Beyond the Conventional Analysis	515
V. Prospects of the Technique and Instrumentation	516
Acknowledgments	516
References	516

**36 Meeting the Challenge of Monitoring Chlorophyll in the Ocean
from Outer Space** **521–534**

André Morel

Summary	521
I. Introduction	522
II. Absorbing Substances in the Marine Environment	523
III. Bio-optical Relationships in Oceanic Waters and Chlorophyll Algorithms	525
IV. Reflectance of Oceanic Waters	528
V. Phytoplankton Distribution and Primary Production	528
VI. Sun-stimulated Fluorescence	531
VII. Concluding Remarks: The Atmospheric Correction	531
Acknowledgments	532
References	533

37 Geochemistry of Chlorophylls **535–561**

Brendan J. Keely

Summary	536
I. Introduction	536
II. Chlorophyll Transformations	544
III. Timing and Nature of Transformations	551
IV. Transformation Scheme	553
V. Applications	554
VI. Concluding Remarks	556
Note Added in Proof	556
Acknowledgments	557
References	557

Index **563**
