

# BIOC 455: TECHNIQUES IN BIOCHEMISTRY AND BIOTECHNOLOGY

## Highlights

- Hands-on experience characterizing a protein from cloning to kinetic parameter determination
- Utilize computational techniques to address authentic, open questions in enzymology
- Gain experience utilizing primary literature to form hypotheses and construct your own background knowledge

SPRING  
4 Credit Hours

Prerequisites: Chem 232 or Chem 236, Credit in MCB 251,  
and MCB 354 or MCB 450
