MS IN MCB

Master of Science Degree in Molecular and Cellular Biology (Course-based MS Program)

- This Master's degree program is directed toward students who want advanced preparation for professional school or future careers in industry, government, or academia.
- This degree program is a terrific opportunity for students interested in the biomedical field who are planning to go into the health professions.
- The purpose of this degree program is to provide an educational option for advanced study in the field of molecular and cellular biology without requiring a research thesis component.
