

Appendix E – Corrections & Revisions

Revised through 18 December 2006

As emphasized in the Introduction, this Guide is a "**work-in-progress**", and will be revised as we and other users find errors and better ways to aid in identification. Again, constructive comments and criticisms would be greatly appreciated.

Each file has a "Revised through" date, so that the user will know whether or not they have a current version. The **current** versions are dated **18 December 2006**.

Minor changes, cosmetic and otherwise, made in the web-pages, msWord files and PDF files, will not be reported here. Changes of significance that affect the utility of the Guide will be reported here in the following **format – examples only**:

Overviews (2x)

P3	Line	altered description.	8/28/06
----	------	----------------------	---------

Sub-Guides

B	<i>Micromitrium</i>	altered description.	9/4/06
---	---------------------	----------------------	--------

P1	Bottom 1/4	altered description.	8/28/06
----	------------	----------------------	---------

P19	Line 1	altered description.	8/28/06
