

UNDERGRADUATE RESEARCH OPPORTUNITY IN MICROBIOLOGY LAB

There are currently openings for undergraduate student researchers in the lab of Dr. Steven Blanke (Department of Microbiology). The student will work on an independent project pertaining to the interactions between bacterial pathogens and host cells.

- Seeking for highly motivated students, who are interested in interdisciplinary research
- Tailored for those considering research at the graduate level
- Able to commit to at least 3 semesters in addition to summer semesters
- No research experience necessary
- Having taken introductory MCB courses is highly recommended
- The student will be expected to participate in laboratory meetings/discussion
- SERIOUS time commitment is required, able to work flexible hours (early mornings, evenings, between classes, weekends)

Any interested students should email Megan Ringling at <megandr3@illinois.edu>. Please include a cover letter and CV for interview consideration. The cover letter must include how a research position will benefit the applicant and further his/her academic goals. Expected date of graduation must be clearly stated in the CV. Please respond by August 19, 2022. Review of applications will commence first week of classes in August 2022 and interviews and acceptances given on a rolling basis. The student will commence laboratory duties immediately this upcoming Fall 2022 semester. Please contact <megandr3@illinois.edu> with any questions/concerns.
