

## 2019 SUMMER UNDERGRADUATE RESEARCH EXPERIENCE MAY 28 – AUGUST 2

2 Locations: University of Pennsylvania & Washington University in St. Louis

CEMB seeks motivated undergraduate students for its 2019 summer REU program. Students participate in a 10-week, on-campus program, and work in a research group at one of 2 sites. Research areas include:

- molecular biology
- cell and tissue mechanics in plants & animals
- bioengineering
- biochemistry & biophysics
- computational biology
- biomedical devices
- nanoscale science & engineering

### Program Benefits:

Mentored research

Professional and academic development activities

Field trips

Competitive stipend

Summer housing

Reimbursement of relocation expenses

Travel to and present your research at the annual CEMB retreat
