CS 199

Prof. Lenny Pitt

Spring 2007

MWF 10 a.m.

+ weekly lab

Little Bits to Big Ideas

Computer Science for non-majors

Artificial Intelligence

Can Computers Think?
How did a program beat
the world chess champion?

Learn about Neural Networks,
Genetic Algorithms

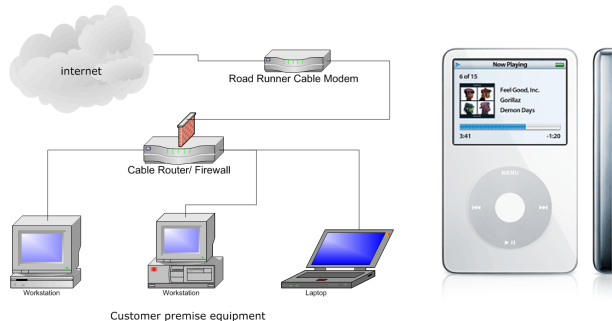

Ever wondered how computers work?

What goes on beneath that hood?

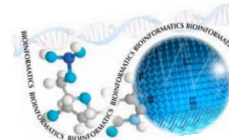

How does the Internet operate?

What happens when you download music,
and how does an iPod store so much?

What does Computer Science have to do with the Human
Genome Project, forensic science, or the design of new
medicines?

What *CAN'T*
Computers do? ...

... and much, **MUCH** more
