

COLUMBIA UNIVERSITY IN THE CITY OF NEW YORK

MICROBIOLOGY & IMMUNOLOGY

The Coordinated Doctoral Program at the Department of Microbiology & Immunology of Columbia University offers students an educational environment unique in both academic and course offerings as well as campus life and research opportunities. Applications for the program are due by **December 5th, 2011**.

Live in New York City

Live in the artistic, intellectual, and cultural capital of the United States. The city offers something for everyone — cultural events, a rich and varied nightlife, and an incredible selection of art, music and food.

Perform Cutting Edge Science

Join a vibrant community of faculty, researchers, and students in the department. We offer students an unparalleled opportunity to learn research in microbiology, immunology, genetics, biochemistry and cell biology from some of the world's leading scientists.

Full Stipend & Tuition

All of our doctoral students are provided a stipend of over \$33,000 a year, free tuition, and free health insurance. In addition, low-cost housing options are available for all students near campus.

Apply Now
