

2013 Khorana Scholars Program

Research Opportunities for STEM Undergraduate & Graduate Students in India

The Khorana Scholars Program provides the opportunity for graduate and undergraduate students to have enriching overseas research experiences by working in top Indian labs. All out-going scholars will travel in cohorts to India and receive accommodation, lab mentoring, and supervision. Competitive funding for both graduate and undergraduate students in this program includes the following:

STIPENDS and/or AIRFARE

- Requirements:**
- Undergraduate or graduate student status;
 - Enrollment in one of the following fields: all STEM (science, technology, engineering, mathematics), as well as agriculture, medicine, and public health;
 - Minimum GPA 3.0; and
 - Thoughtfully crafted research statement (one page; see application form)

Process: Applications available online at <http://bit.ly/Khorana>
Applications should be submitted to your university's Khorana Scholars Program administrative contact (See contact name listed below.)

Timeline: Application due on or before **February 15, 2013.**

This program is supported by universities that are members of the Committee on Institutional Cooperation, which is an academic consortium of the Big Ten universities along with the University of Chicago, and other universities. Student cohorts traveling to India will be made up of students from these institutions.
