Advanced Summer Program for Investigation and Research Education

The Advanced Summer Program for Investigation and Research Education (ASPIRE) is an applied research opportunity at Washington University School of Medicine offered to current college students. Under the direction of clinician-researchers, Vicky Fraser, MD, Jay Piccirillo, MD, and David Warren, MD, the purpose of ASPIRE is to immerse young investigators in clinical research. The Program includes didactic sessions, seminars, and a hands-on mentored research experience, all for academic credit.

Program Dates: June 1, 2017 to July 31, 2017

Application Deadline: February 15, 2017

Tuition required to participate in ASPIRE totals \$2,400 for three undergraduate academic credits. Scholarships are available. Please see the application instructions at crtc.wustl.edu/aspire to be considered for a scholarship.

Program Benefits

- Mentor-Supported Research
- 3 Hours of Undergraduate College Credit
- Textbooks for Training Sessions
- Tools to Provide an Understanding of Medical Research
- Networking Opportunities for Career Building

Eligibility Requirements

- Commitment to full-time (40 hours per week) effort for the duration of the program
- Current full-time College Freshman, Sophomore, or Junior
- Must be 18 years of age by June 1, 2017
